

Arrington

Date of Release - 2000; plant patent #12,641

Type - Yellow, non-melting flesh, cling.

Fruit Maturity Date - June 24

Fruit Size - Medium, average 125 g.

Skin Color - Red and orange mix, with red blush covering approx. 60% of the skin.

Flavor, Sweetness - Very good, mild nectarine flavor, 12.2 % soluble solids.

Fruit Firmness - Firm, and maintains good firmness near full maturity.

Bloom Date - March 20.

Bacterial Spot Resistance - Moderately resistant, and this disease seldom observed on fruits.

Comments - Arrington has non-melting flesh, and should handle better after harvest than many melting-flesh nectarine varieties.
