2026 Soybean Research Verification Program Weekly Update
August 7, 2026

Update No. 16

General	By Chris Elkins. Rain was limited again this week, Clay County receiving the most rain with 1.02” and four fields receiving no rain. Corn earworm pressure reached threshold in Prairie County. Stinkbug numbers have also increased slightly. Disease continues to move slowly and not expected to be a problem in most fields. Refer to table below for field specific information.		
County	**Variety**	**Stage**	**General Information**
Clay	Asgrow AG49XF4	R5	Received 1.02” rain, Early R5, insect and disease pressure remains low. Third irrigation scheduled for 8/10.
Cross	Asgrow AG47FX2	R5	Received .09” rain, Almost R5, insect and disease pressure low, slight defoliation, second irrigation 8/4.
Drew	DynaGro S47XF23S	R6	No rain, R6.5, final irrigation 8/6.
Jefferson	Delta Grow 48XF70STS	R6	No rain, R6.5, did not require additional irrigation.
Lawrence	Progeny 4515XFS	R5	Received .11” rain, R5.8, 3/25 Stinkbugs, irrigation scheduled for 8/7.
Mississippi	Becks 4999XF	R5	Received 1.16” rain, R5.8, insect and disease pressure remain low, third irrigation 7/29, fourth irrigation scheduled for 8/8.
Phillips	AgriGold G4910XF	R6	No rain, Dryland, very dry, shutting down prematurely, majority of the field reached R 6.5.
Poinsett	Asgrow AG47XF2	R4	Received .3”, Early R5, good pod set, low insect and disease pressure, third irrigation 7/31, next irrigation anticipated for 8/10.
Prairie	UA54I19GT	R2	No rain, almost R3, 12/25 corn earworms reached threshold, will apply 5 oz. intrepid edge, irrigated 8/1.
White	Armor 48F55S	R6	Received .08” rain, almost R7, Done. Waiting on harvest.
Woodruff	Asgrow AG48XF3	R5	Received .17” rain, Almost R6, 4/25 Stinkbug, third irrigation 8/5.
